Midwest Environmental
Consulting, LLC

Midwest Environmental Consulting (MEC) staff have been providing environmental and safety training for over 25 years. MEC is one of the only training providers that also has experienced field staff who have been involved in inspections, risk assessments, head hazard remediation, project management and design.

Let MEC's experienced staff provide not only information on regulatory requirements, but also real life in-the-field knowledge on projects and let us help guide you and your employees to be more professional about lead hazard reduction activities and lead safe work practices.

While lead hazard reduction activities have been used since the late 1980's, new technology has found that even low levels exposures may lead to adverse health effects. Let MEC help your organization understand the growing information on lead hazards and the ever evolving rules that govern lead hazard reduction.

This course has been approved by the MN Dept. of Labor & Industry for 8 hours of MN residential building contractor continuing education credits.

Certified Renovator Lead Safety for Renovation, Repair & Painting Initial Training (RRP)

Purpose:

This EPA/HUD joint course trains individuals on how to become Certified Lead-Based Paint Renovators with proper lead safe work practices

Content:

- Why Should I Be Concerned About Lead Paint
- EPA/HUD Regulations
- Before Beginning Work
- Contain Dust During Work
- Cleaning Activities & Checking Your Work
- Recordkeeping
- Training Non-Certified Workers
- State Specific Regulations/Rules

This Regulation Applies:

If you work (for compensation) on pre-1978 residential properties, child occupied facilities or schools.

If you disturb 6 sq. ft. of known or assumed lead-based paint inside or 20 sq. ft. outside

If you are a painter, renovator, plumber, electrician, handyman/woman, specialty contractor, or maintenance person in schools or multi-housing complexes.

GENERAL INFORMATION

The registration fee, less 15% administration charge, is refundable if written cancellation is received two weeks prior to the course date. After that time, no refunds are available. Registrations are accepted on a first-come, first served basis and must be accompanied by prepayment. Enrollment is limited, therefore early registration is recommended.

Upon receipt of your registration, a confirmation letter with further information will be sent (e-mailed). Group discounts and on-site training are available for companies with many persons to train. Please call 320-679-4054 or 763-691-0111 for further information.

Training will be held in Coon Rapids or other locations throughout the State as designated.

Tuition:

Tuition for the Lead Safety Renovation, Repair & Painting is **only \$215.00** unless otherwise designated. Tuition includes course instruction, refreshments and course materials. Lunch is not provided.

This course meets the EPA training requirements for certification towards Lead Certified Renovator certification under Section 402 of TSCA

To receive a certificate verifying completion of this course, attend complete session, pay in full, and pass a final written examination with a score of at least 70%
